
So you want to make music or learn about sound design? Logic Pro 9 is a full-featured digital audio workstation software that is pretty much the industry standard for professional music production. While it's not necessarily the cheapest option out there, there are still plenty of discounts available, available to both Mac users and Windows users. Whether your budget is tight or you just don't have time for anything less than the best, Logic Pro 9 can be your solution. Below are detailed steps on how to download Logic Pro 9 for Windows 7 so you can get started with making music right away!

Link 1: <https://www.apple.com/logic-pro/> Link 2: <http://www.macupdate.com/info.php/id/13829/logic-pro-9.0.6> https://www.microsoft.com/store/apps/9NJHJ2BTM3L2?sku=MicrosoftSite&KpiD=0&hashedid=436411702&f_4100000_dafacac0cfc3de96325492317e5829af&gclsrc=aw.ds Link 3: <http://www.softpedia.com/get/Multimedia/Music-Production/Logic-Pro.shtml> <http://www.macupdate.com/info.php/id/13829/logic-pro-9.0.6> <http://www.macupdate.com/info.php?artnum=13829> Logic Pro 9 for Windows 7 1) Download the x64 or x32 depending on your computer's system requirements from the links above and install the application to your preferred location on your system's hard drive. 2) When you've finished the installation, launch Logic Pro 9 for Windows 7 3) On the main menu, click on Window>Resources>Configuration Manager. 4) Click on the New button in the bottom-left corner to create a new Configuration file. 5) At the bottom of the window, click where it says "Name" and type in MPC Setup. 6) Click on save after writing your name and click ok after that to save your new configuration. You will not be able to use MPC until you add this configuration file into your application! Click Ok when done saving this file. 7) After saving your configuration file, go back to the Configuration Manager. 8) Choose the MPC Setup you just created and click on open. Once you press ok, Logic Pro will take a moment to open and read all the information from your configuration file. If it doesn't work, you can try restarting your computer then opening it again! 9) Now that everything has downloaded and installed, let's focus on getting Logic Pro working correctly. You will want to check the System Requirements before moving forward with this tutorial! 10) Close out of any applications that are running. This is not necessary but recommended in order to ensure things are running properly whenever Logic Pro is launched.
